COLLECTIONS OF ORNAMENTALS AND FRUIT TREES

THE thought has often come to us that our customers may sometimes be lost among the large variety of plants offered in our Catalogue, "Southern Planting Facts." It is difficult to select a small number of plants from such a wide range of varieties. In this circular we have brought together four collections of ornamental plants and one of fruits and briefly described and illustrated them. There is a collection of Evergreen Shrubs, one of Roses, another of Fruits, a fourth of Ornamental Plants, and a fifth of Palms. These are offered in groups to our trade at prices lower than those quoted in our Catalogue for the same materials priced singly, because we are able to reduce our digging and packing costs by handling them this way. We cannot break the collections at these prices, but as many collections may be ordered as desired. A combination of two or three collections will make a splendid foundation planting or a shrubbery border. They may be ordered by numbers. The varieties are the finest; the quality of the stock is the best. Every one of these collections will give satisfaction and pleasure if properly planted and cared for.

Collection of Evergreen Shrubs

COLLECTION No. 1

Evergreen Shrubs

Our No. 1 Evergreen Shrub Collection consists of one each:

Abelia	Feijoa	Ligustrum
Bottle Brush	Ilex vomitoria	Podocarpus
Camellia japonica	Jasminum primulinum	

These are grown in pots or are lifted from the open ground and balled in burlap.

Abelia. A very beautiful evergreen shrub adapted from Florida to points as far north as Philadelphia, and even farther along the coast. It reaches a height of 6 to 8 feet and is easily kept at almost any lower height by careful pruning. It produces white, trumpet-shaped flowers, flushed with pink, from the tips of the branches from June to November. A very fine shrub. 2-year plants.

Bottle Brush. This beautiful evergreen shrub comes from Australia. It has narrow, dark green leaves and gray branches. The flowers are bright red, in cylindrical, brush-like spikes, opening in April and continuing in bloom for several weeks. It is a striking plant wherever seen. Plants from 6-inch pots.

Camellia japonica. Of all the shrubs grown in southern gardens, the Camellia is always given first place. The leaves are dark green and glossy. It blooms during the winter months, producing a profusion of beautiful, highly prized flowers. The specimens included in this collection are grown from seeds of fine strains. 18 to 24-inch plants.

Abelia

Feijoa. This interesting relative of the guava is a very hardy plant, with leaves glossy above and gray beneath. The flowers are large, single, white with striking clusters of reddish stamens. It is easily grown and is a very desirable shrub. Plants from 8-inch pot.

Ilex Vomitoria. This species, commonly known as Yaupon, is one of the finest

of the Hollies. The leaves are small, borne on rather stiff, rigid branches, and the fruiting specimens have very bright wine-red berries. All our plants are carefully pruned to form dense heads. 2 to 3-foot plants.

Jasminum primulinum. This Jasminum has very long, slender, green branches, which droop over as the plant grows upward, making very compact bushes. The bright yellow flowers are borne in early spring and summer. It is easily grown and is not particular about soil or drainage. 2-year plants.

Ligustrum. One of the finest evergreen shrubs, and grows well in sun or shade. Its bright, glossy foliage is the same the year round. Flowers white, followed by clusters of bluish black fruits. 18 to 24-in. plants.

Podocarpus. Among the coniferous evergreens, the Japanese Plum Yew has no superior. The narrow, rather thick leaves are dark green when mature, but at the new tips they are light-colored, and this combination of new and old leaves gives the plant a very pleasing appearance during its growing season. It may be grown in either sun or shade, and is not particular as to soil. 2 to 3-foot plants.

COLLECTION No. 2

ROSES

Our Rose Collection is made up of five varieties, which for strength of growth, ease of culture, and freedom of bloom cannot be surpassed. It includes one each of the following:

Radiance
Red Radiance
Mrs. Charles Bell
Climbing Maman Cochet
Climbing White Maman Cochet

Radiance Roses. When John Cook of Baltimore, Md., originated the Radiance Rose, he conferred a boon upon American Rose-growers greater than he could possibly have known. This variety and its two sports, Red Radiance and Mrs. Charles Bell, stand unequaled among Rose varieties the country over. Probably it is not too much to say that in many sections more of these Roses are planted than of all other varieties

put together, and it will probably be many years before their places are taken by other sorts. **Radiance** has flowers colored in two shades of pink—dark pink on the outside of the petals and light pink within; **Red Radiance** is a strong cherry-red in color; while **Mrs. Charles Bell** is a beautiful shade of shell-pink, which makes one think of the old Duchesse de Brabant. All are strong growers.

Climbing Maman Cochets. These are strong-growing climbing Roses, with the same beautiful foliage and pink or white flowers as the bush sorts of the same name.

Strong-grown bushes of our best quality are shipped in this collection which will grow vigorously and bloom profusely if given proper care in planting, cultivation and watering. It would be a good plan to order several of these collections to assure a larger supply of these superb flowers valued so highly for cutting and garden decoration.

Price for Collection No. 2, \$3 sent collect; or \$3.25 postpaid

Climbing Maman Cochets

Owari Satsuma Orange

Success Pecans

Tane-Nashi Persimmon

COLLECTION No. 3

FRUITS

Wherever space affords, fruits of some kind should have a place on the home grounds. If there is room enough, there should be a fruit-garden by all means; otherwise, fruits can be planted in the shrubbery border. Each of the fruits offered in this Collection is the best of its kind, or the equal of any variety adapted.

Owari Satsuma Orange

Success Pecan

Tane-Nashi Persimmon

Carman Grape

Celeste Fig

Excelsior Plum

Pineapple Pear

Angel, or Belle of

Georgia Peach

Owari Satsuma Orange. This is the finest variety now grown in the Gulf Coast country. It ripens in October and November, the tree is very hardy, and the fruit of excellent quality. 3 to 4-foot trees.

Pineapple Pear. A blight-resistant Pear that is easily grown. Fine for cooking and very prolific. 3 to 4-foot trees.

Tane-Nashi Persimmon. Produces large, seedless fruits of very fine quality, ripening August to October. Very widely planted. 3 to 4-foot trees.

Celeste Fig

Excelsior Plum. This fine cross-bred Plum originated on our grounds. Without question it is the best variety for the Lower South. 3 to 4-foot trees.

Success Pecan. This Pecan produces fine, large, thin-shelled nuts and bears heavily. It ranks as one of the best varieties. 3 to 4-foot trees.

Peach. Of this fruit we offer a choice of one tree, selected from three varieties, for we consider no one variety is adapted to all the southern country. For Coastal Georgia, North Florida, and the Gulf Coast, Angel; for sections further north, Belle of Georgia. 3 to 4-foot trees.

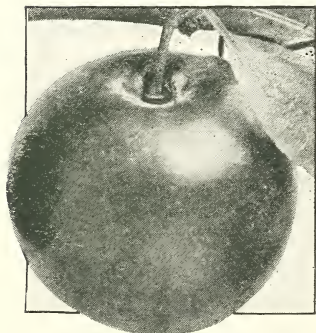

Celeste Fig. This is the most widely distributed of all the Figs grown in the South. Fruit is of fine quality, small to medium size, and pear-shaped. The tree is very hardy. 3 to 4-foot trees.

Carman Grape. This is one of the most popular of the bunch Grapes for growing in the Lower South. The large, black fruits are borne in clusters of great size. Quality excellent. 2-year sizes.

Liriope graminifolia

Zamia integrifolia

Yucca aloifolia

Eucharis grandiflora

COLLECTION No. 4. Miscellaneous Plants

In this Collection are included five fine plants. Some of them are quite rare, and all are out of the ordinary.

***Zamia integrifolia*.** Its common name is Coontie. The leaves resemble those of a large, coarse fern. Very desirable. Medium-size roots.

***Liriope graminifolia*.** This grows in dense clumps. Leaves broad and grass-like; flowers violet-colored, borne in spikes well above the leaves.

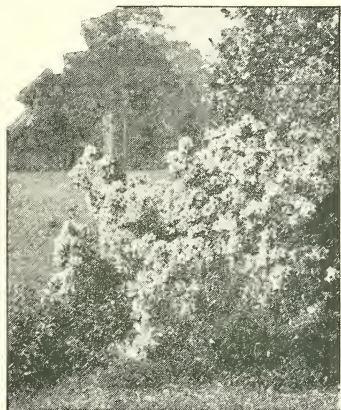

A beautiful plant, hardy north to Washington. Medium-size clumps.

***Yucca aloifolia*.** The Spanish Bayonet, with stiff, sharp-pointed leaves on an upright trunk 4 to 6 inches in diameter, and crowned with spikes of striking creamy white flowers in summer. 8 to 12-inch plants.

***Eucharis grandiflora*.** The Amazon Lily makes an excellent pot plant for colder sections, and is very satisfactory outdoors from Middle Florida southward. Flowers are white, cupped, resembling a narcissus, borne in clusters of three to six. 6-inch pot plants.

***Azalea indica*.** Among winter-flowering shrubs for the southern garden there are none finer than *Azalea indica*. Choice of color, one plant of Red, Pink, or Orange. 8 to 12-inch plants.

Price for Collection No. 4, \$3.50, express collect

Azalea indica

COLLECTION No. 5 PALMS

Three of the finest Palms for the garden are offered in this collection.

***Cocos australis*.** Very hardy, with gray-green foliage. 2 to 3-foot plants.

***Washingtonia robusta*.** A rapid-growing Palm with bright green, fan-shaped leaves. 2 to 3-foot plants.

***Phoenix canariensis*.** The Canary Island Date Palm. One of the most ornamental of all the Palms, and well adapted to the Lower South. 2 to 3-foot plants.

Price for Collection No. 5, \$6.65, express collect
